

# This is Cool

- Place one finger in the cooler water and one finger in the warmer water at the same time.
- Leave them in the water for 15 seconds.
- Place the finger from the cooler water into the middle container. How does that finger feel? Warmer or colder?
- Place the finger from the warmer water into the middle container. How does that finger feel? Warmer or colder?

## Questions

If you walked into a 72-degree F room from outdoors when the temperature outside was 90 degrees F, how would it feel? Why?

If you walked into a 72-degree F room from outdoors when the temperature outside was 20 degrees F below zero, how would it feel? Why?
